</thead>
</table>
| **INTRODUCTION** 15 minutes | - Use 7.1a walkthrough PowerPoint  
- Introduce the project i.e. to design a sports website with a homepage, a players page, an information page and a history page.  
- Demonstrate how to create root folder |
| **MAIN ACTIVITY** 30 minutes | - Creating a root directory for the website (see the Dreamweaver Guide for more information) |
| **PLENARY** 5 minutes | - Emphasising the importance that all files to be associated with the website must be saved in the root directory and that copy and paste techniques do not work with Dreamweaver |

**Suggested extension activities or cross curricular links:**

- Images for the website could be collected at home, via the Internet, and then saved to memory stick ready for uploading to the images folder.
